

## Carlson End Of Service Notification

### Carlson EOS Notification:

EOS Notification for legacy MDL CALS MK2

**EOS Notification Date:** April 1st, 2019

Dear Customer,

MDA057

Carlson is announcing final termination of hardware and software support of the following product:

- Legacy MDL CALS MK2 (Cavity Auto Scanning laser) Product Code: MDA057
- MDL Cavity Scan Software
- Renishaw Cavity Profiler

Carlson announces it is no longer possible to support this product due to all spare parts being exhausted. Further to this, calibration test software is no longer compatible with current computer operating systems.

- End of production December 2011
- End of spare parts manufacture December 2016
- End of software compatibility March 2019

Carlson hopes that this announcement assists you in planning your future requirements.

**Replacement Product:** Cavity Auto-Scanning Laser System (C-ALS®).

A-5913-0001 & A5913-0007

Carlson would like to recommend that you upgrade your C-ALS to this newer release in order to utilize recent improvements that include:

- Faster scanning speed
- Optional Gyro navigation for greater headings accuracy
- IP67 rated
- New data processing software
- Improved durability and mechanical design

**Full specification available at**
