

Carlson End Of Service Notification

Carlson EOS Notification:

EOS Notification for LMD Mining Product Quarryman Pro lead acid variant.

EOS Notification Date: April 1st, 2019.

Dear Customer,

Carlson is announcing the phase out of hardware support and service of the following product:

- (MDL) Quarryman® Pro reflector-less rock profiling and 3D laser scanning system and associated accessories, LR variant: Product code 4004S, SR variant: Product code 4005S.

Carlson will continue to offer calibration services on this product after the EOS date, however, service and repair will be limited where obsolescence of parts and certain test equipment makes repair impossible.

Carlson hopes that this announcement assists you in planning your future Quarryman requirements.

Reason for Termination:

- Obsolescence of electronic parts

Replacement Product: QUARRYMAN PRO SYSTEM (LITHIUM-ION VARIANTS)

Long Range variant: Product code A-5915-0016 Short Range variant: Product code A-5915-0015. Carlson would like to make you aware of the option to upgrade to this newer release in order to utilize recent improvements that include, recording directly to a USB drive, easy data export to blast design software and faster scanning speed.
