

Carlson End Of Service Notification

Carlson EOS Notification:

EOS Notification for legacy MDL/Renishaw VOID SCANNER MEMS Sensor Variants

EOS Notification Date: April 1st, 2019

Dear Customer,

MDA077

Carlson is announcing final termination of hardware and software support of the following product:

- Legacy MDL/Renishaw VOID SCANNER with integrated dual axis MEMS Sensors.
Product Code: MDA077
- MDL Cavity Scan Software
- Renishaw Cavity Profiler VS

Carlson announces it is no longer possible to support this product due to all spare parts being exhausted. Further to this, calibration test software is no longer compatible with current computer operating systems.

- End of production December 2014
- End of spare parts manufacture December 2014

Carlson hopes that this announcement assists you in planning your future requirements.

Replacement Product: Laser-based cavity monitoring system.

Carlson would like to recommend that you upgrade your Void Scanner to this newer release in order to utilize recent improvements that include:

- Faster scanning speed
- New data processing software
- IP65 Rated
- Improved durability and mechanical design
