

In SurvCE Version 2.50 and higher you can go into File / Feature Code List / and tap the “SET” button in the upper right corner.

Code List: good_Sample

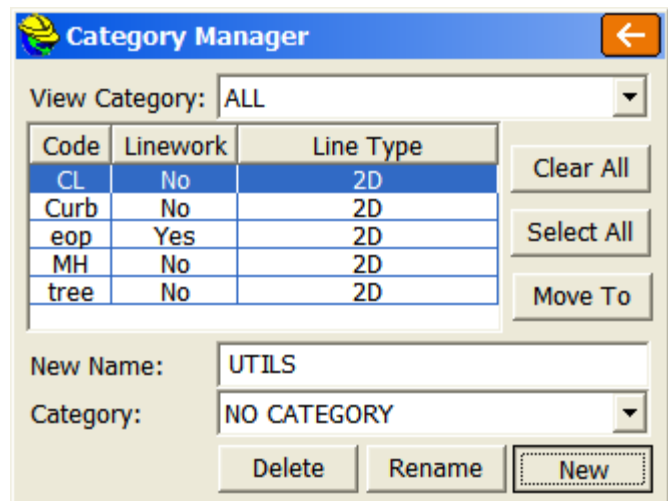

Category: ALL Set

Code	Linework	Line Type	Layer Name	Full Text
CL	No	2D	CL	Centerline
Curb	No	2D	Curb	Curb and Gutter
eop	Yes	2D	PAVE	Edge of Pavement
MH	No	2D	EX_UTILS	Manhole
tree	No	2D	VEG	Tree

Add Edit Remove

Load Save As Special Codes

You can type in a category you want to create where it says “New Name” such as “UTILS” and click the “New” button in the bottom right corner. Then tap the “Orange Arrow” to exit to the Code List.

Category Manager

View Category: ALL

Code	Linework	Line Type
CL	No	2D
Curb	No	2D
eop	Yes	2D
MH	No	2D
tree	No	2D

Clear All Select All Move To

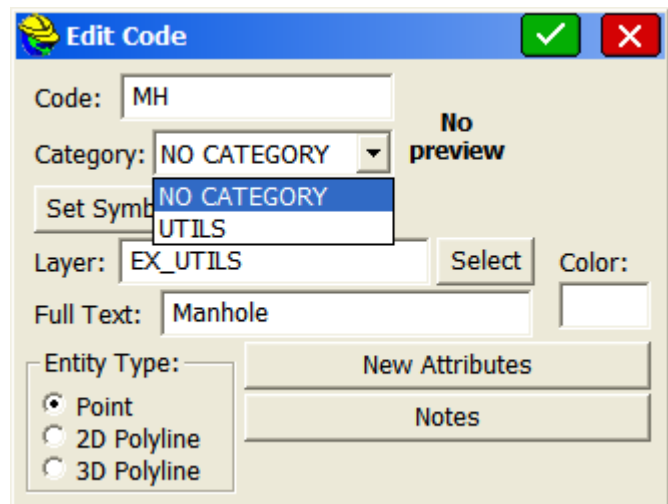

New Name: UTILS

Category: NO CATEGORY

Delete Rename New

Then you can edit a code like MH for manhole or EOP and set the Category for each one as shown here.

*****Please Note:** After assigning your new categories to your Feature Codes its recommended that you tap the Orange Back Arrow and tap “YES” to save your changes to apply the new category assignments

Edit Code

Code: MH

Category: NO CATEGORY No preview

Set Symbol NO CATEGORY UTILS

Layer: EX_UTILS Select Color:

Full Text: Manhole

Entity Type:

- ☒ Point
- ☐ 2D Polyline
- ☐ 3D Polyline

New Attributes

Notes

After you've backed out to the Main File menu and tapped "YES" to save your changes you can back into File / Feature Code List and now you can filter your File / Feature Code list by Category at this point.

Code List: good_Sample ←

Load Save As Special Codes

After setting your codes on different Categories you can go into Survey / Store Points / turn "Hgt_Desc" prompts and and store a point.

This gives a choice to filter the options to only display a custom category like "UTILS" as shown below:
