

## Transferring Data From A Desktop Computer To The Carlson Supervisor

Transferring data from Carlson's desktop software to the Supervisor can be done through one of the following methods:

Use of a "Bridged" or USB Network Cable

This type of USB to USB cable has an electronic circuit at the center for interconnection between two PCs.

When used, the USB cable which will trigger a program on both Windows devices called SuperLink.

CD Drive (D:)	SuperLink
Always do this for so	oftware and games:
Install or run program	from your media
Run SuperLink.exe	Technology Inc.
	· · · · · · · · · · · · · · · · · · ·
General options	STATISTICS IN CONTRACTOR OF THE OWNER
General options Open folder to view using Windows Exp	v files blorer

The user is then presented with dual windows containing the information from each computer.
