

If your workstation is having difficulty accessing network licenses from your network server, you may "point the program" to the license manager by setting an environment variable, on the workstation.

1. Left Click on the Windows icon, found on the bottom, left-hand corner of your computer screen. ፼

Then, Click on the Settings icon.

2. Select System from the Windows Settings menu.

3. Select About from the Settings menu, on the left-hand side of the screen.

4. Click on System info, under Related settings, on the top-right corner of the computer screen.
