7. SurvCom is a divided window which displays the available data on your PC on the left-hand side, and the available data in your data collector on the right-hand side.

Each window pane shows where the program is currently looking at data. This is referred to as the Data Path. The Remote Path should always be set to the DATA folder, of your data collector.

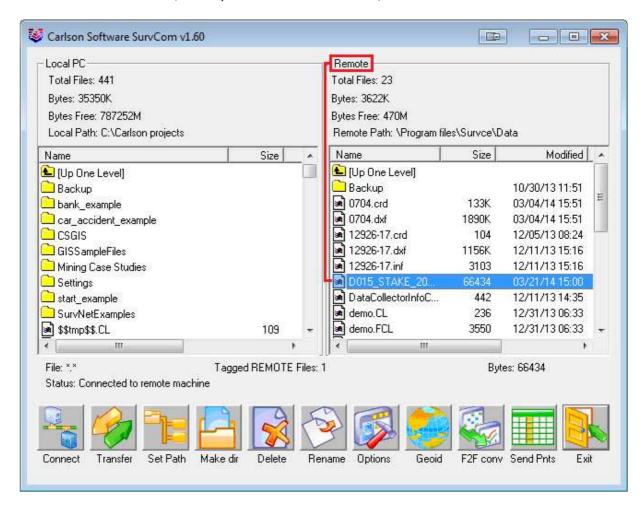

To set the path to the data folder:

First, double-tap on Program Files
Then, double-click on SurvCE
Then, double-click on Data
